

TECHNICAL DATA SHEET

SANVO Jian Ai Qing Wei interior wall paint E2D

Product Description

SANVO Jian Ai Qing Wei interior wall paint adopts advanced taste-clearing technology and advanced synthesis technology to develop high-cost paints. The product has fresh smell, good leveling, easy construction, fine and smooth paint surface, and high whiteness. It is an affordable environmentally friendly wall paint for interior wall decoration.

Applications

The interior decoration of the building, including concrete, brick wall, dust and other surfaces.

Features

- Fresh smell
- Good leveling
- Easy construction
- Smooth paint surface

Color

White or according to needs

Typical Properties

Composition	Acrylic copolymer, Ision pigments, fillers,additives and water
Package	Tin bucket
Dilution ratio	0 ~ 5%
Construction temperture	5°C ~ 35°C
Recoat time	>2h
Maintenance time	7 days/25°C
Storage condition	No forest and keep dry
Consumption/layer thickness	8 ~ 10m ² /kg/layer (dry film 30 microns)

Grassroots treatment

New wall: Remove the surface dust, grease and loose mud. If there are gaps, they should be repaired. The wall to be painted must be clean, dry and flat.	Repaint the wall: remove the weak paint film on the old wall, remove the surface dust and powder, and smooth the wall. Ensure that the wall to be painted is firm and free of loose objects, clean, dry and flat
---	--

Construction

The product can be constructed in the following ways

Spraying: use airless spray

Roller coating/brushing: use roller coating and brush, pay attention to achieve a specific dry film thickness

Transpotation and storage

1. This product is a non-flammable and explosive material and can be transported as general cargo.
During transportation, avoid rain, exposure, and freezing, avoid squeezing and collision, and keep the packaging intact.
2. Under normal transportation and storage conditions (0~35°C), the shelf life is 18 months.
